

**KAPOW!**

**"EVERYONE'S  
AN**

**ASSET  
BUILDER"  
TRAINING**

## TRAINING OPPORTUNITY

### What is it?

*Everyone's an Asset Builder* is a fun and interactive training that teaches participants about the Developmental Assets Framework researched and developed by Search Institute. Participants will learn about the power of assets to protect and promote youth success.

The developmental assets are a strength based approach for working with young people by focusing on their positive attributes and helping youth build on the bright spots already in their lives.

The assets framework is **NOT** a curriculum or program with a complicated set of strategies that require time and energy to implement.

### What can I expect?

Training participants will be affirmed that they are already building assets in youth. They will come away challenged to be authentic and intentional in order to increase their asset building impact.

The training activities highlight simple, everyday actions that individuals can perform to make a big difference in the lives of young people.

## HOW DO I SIGN UP?

*Everyone's An Asset Builder* is great for anyone seeking to make a positive difference in the lives of youth. Community members, parents, teachers, youth workers, coaches, professionals, pastors, volunteers, staff members, administrators, etc. will all find the Developmental Assets Framework to be a useful tool.

All trainings are fast paced, interactive and customizable to your group size and available time frame. Training length can range from 1.5 hours to 3 hours, depending on the needs of your group.

**For more information or to set up your customized training contact your organization's representative or:**
